

**Congratulations on Choosing the Tribeca or Vision album! With care in handling and storage, the Tribeca/Vision should prove to be a priceless heirloom to pass down through the generations. Because custom albums like the Tribeca and Vision represent a considerable investment, we want our clients to be thrilled with the album — not only now but for years to come. By taking a few minutes to complete the checklist, we will avoid any “surprises” down the road and ensure that your album is exactly what you hoped for. Please initial your choices below.**

## 1 The Images

To keep a clean and simple yet elegant look, we recommend that your album has an average of 2 images per side. (A side is one side of a page, so each page has 2 sides). If you prefer your images to be larger throughout the album you may choose less than 2 per side average. For every 10 sides you order, you may direct that 2 images of your choice appear larger in size than others.

**To direct which images I chose for my album I have:**

- \_\_\_\_\_ a. Set up a folder on my Pictage page called “Tribeca Album” with the images inside
- \_\_\_\_\_ b. Enclosed a CD/DVD with my choices on it (on this option you may renumber photos for your preferred order)
- \_\_\_\_\_ c. Enclosed a list of numbers based on the Pictage numbers (not recommended as it is harder to verify in case numbers vary)

## 2 Sequence

While it is virtually impossible to keep an exact chronological sequence per image, your album will be in the general order you direct (usually chronological). For example, each side will pertain to an aspect of the day, eg. The ceremony, the reception, etc., but the photos on the side may not be in exact chronological order. It is common for the album to start and end with a portrait type shot of the couple with the wedding day in between. Some choose an engagement photo to begin the album, but the choice is yours!

**I understand the above re: sequence and I have chosen to:**

- \_\_\_\_\_ a. Begin the album with image # \_\_\_\_\_ and end with image # \_\_\_\_\_ with the wedding day in general order to follow.
- \_\_\_\_\_ b. Begin with “getting ready” photos and end with “leaving the reception” photos
- \_\_\_\_\_ c. Let Aaron Imaging choose what would look best

## 3 Design

If you have viewed any of Aaron Imaging’s sample albums, you noted a simple and elegant look with a lack of the cheesy and cluttered designs common on cheaper albums. We keep to this same pattern for all albums, and we have been doing Tribeca designs since 2002 with 100% client satisfaction. We offer an online preview to assure that you are happy with the design. We offer 2 free changes to the design. (A change is any redirection that affects 1 side. If your change to the design will affect 2 different sides, that would be 2 changes.) Additional changes are \$10 each. If you are super hands-on and very picky, you may meet with us and direct the actual design of the album yourself at additional cost.

**I understand the above and I direct that regarding the design I choose to:**

- \_\_\_\_\_ a. Leave the creative license of the design to Aaron Imaging, and I will see an online proof where I can make 2 free changes and further changes for \$10 per change.
- \_\_\_\_\_ b. I will meet with Aaron Imaging and direct the design for an additional \$40 per hour above the album cost.

## 4 Cover

Album covers for Tribeca are a smooth jet black or a rougher suede looking “distressed brown.” Both are top quality leather.

**I choose:**

- \_\_\_\_\_ a. Black leather
- \_\_\_\_\_ b. Distressed brown

For Vision albums I will send a sample sheet as they offer several combos.

## 5 Pages

We highly recommend a rounded page with Irish Linen texture, but they also offer sharp corners and either plain or sand-like pebbled texture.

I choose:

- a. Rounded corners
- b. Sharp rectangular corners (over time these tend to get "bumped")

For texture I choose:

- a. Irish Linen
- b. Pebbled, sand-like grain
- c. No texture, just a simple matte finish (not recommended)

## 6 Text

We offer 2 lines of text at the bottom right-hand corner. Typical would be:

"Aaron and Ericka"  
"April 14th 1996"

Our two lines of text should read:

---

---

## 7 Text Color

For the brown cover, text will be black. For the black cover, text can be gold, silver, or blind (black engraved into black). After many years, gold and silver will eventually wear off leaving a blind imprint, but they all look good to start.

If I choose a Black leather cover, I would like my text to be:

- a. Blind
- b. Silver
- c. Gold

## 8 Other Options

The album comes with a standard storage box and sleeve; you may upgrade to the premium storage box for \$40.

Upgrade to premium storage box (\$40).

You may also upgrade the size of your album at any point before production, even after the design process. We recommend a 10x10 or 12x12 for visual impact.

Upgrade album size to:

- a. 10x10
- b. 12x12

You may order additional albums for 40% off (must be exact same design although size and type of cover may differ). These make great parent or grandparent albums or gifts for friends who helped make the day complete.

If you choose to add an additional album, just indicate your choices of:

- a. Size ( 8x8, 10x10 etc) \_\_\_\_\_
- b. Color \_\_\_\_\_
- c. Text and text color  
\_\_\_\_\_  
\_\_\_\_\_
- d. Page texture and corner shape  
\_\_\_\_\_  
\_\_\_\_\_

## 9 Payment

Since we do not have a credit line with the album printers, we must receive this completed form along with payment before the album can be printed. Be sure to add NC sales tax of 5.75 % to your total.
