

MICROFIBER XL DURACLEAN WET MOP

The innovation of microfiber provides a significant impact on cleaning and maintaining floors. Unlike with ordinary mops, it does not push dirt around on the floor surface. Instead, it picks up dirt and dust and keeps them in the mop. In addition, microfiber is durable, versatile, absorbent, fast drying, lint free and user friendly.

MORE ABSORBENT

The microfiber in the DuraCLEAN Wet Mop naturally picks up more grime and liquid and easily wrings out more contents than cotton mops.

FAST DRYING

Drying time is reduced by half due to the microfiber in the DuraCLEAN Wet Mop.

LINT FREE

The DuraCLEAN Wet Mop produces zero lint which leaves your floors with a lint-free shine.

GERM RESISTANT

Cotton mops can be a catalyst for mold and mildew growth, but the DuraCLEAN wet mop is resistant to mold, mildew and other forms of bacteria.

ENHANCED APPEARANCE, LONGER LASTING

The DuraCLEAN Wet Mop holds its bright white color much longer than a conventional mop and is machine washable which enables multiple uses.

USER FRIENDLY

Lighter than cotton mops, even when saturated, DuraCLEAN Wet Mop is not only easy to manage but it also is interchangeable with any standard cotton mop handle.

VERSATILE

From hardwood to tile to marble, the DuraCLEAN Wet Mop picks up grease and grime on most any hard surface.

MICROFIBER - POLY/COTTON MOP COMPARISON

	MICROFIBER	POLY/COTTON
Pounds Per Load	600	600
Total Wet Mops Per Load	300	225
Number of Ragout	0	2
Wash Time	22 min	22 min
Dry Time	15 min	33 min
Drying Temperature	150°	200°
Drying Savings Per Mop	60%	None
Heat Temperature Savings Per Mop	33%	None

"The DuraCLEAN Wet Mop has made our work much easier and our floors have never had a shine like this one. Lighter weight, less hassle, more absorbent, faster drying... what more could you ask for in a mop? I will never use that old cotton mop again."

Curtis Smith, Operations Manager
